

Table of Contents

1	Introduction	7
1.1	Background.....	7
1.2	Scope.....	7
1.3	Structure of the Guide.....	9
2	Guiding Principles for Cellular Products Process Design and Equipment Selection	11
2.1	Process Design Overview.....	11
2.2	GMP Framework.....	11
2.3	Process Closure.....	23
2.4	Automation.....	30
2.5	Forward-Looking Industry and Technology Trends.....	46
3	Production Technologies for Cellular Products.....	53
3.1	Introduction	53
3.2	Evaluating Design and Specifying User Requirements	55
3.3	Leukapheresis Thawing and Cell Washing	56
3.4	Enrichment and Depletion.....	58
3.5	Activation	59
3.6	Gene Modification	60
3.7	Expansion	61
3.8	Harvest and Final Formulation.....	71
3.9	Bead Removal	72
3.10	Product Fill.....	72
3.11	Visual Inspection.....	74
3.12	Cryopreservation – Controlled Rate Freezers	74
3.13	Equipment Examples	83
4	Analytical Technologies for Cellular Products.....	91
4.1	Introduction	91
4.2	General Considerations	93
4.3	Analytical Technology Capabilities.....	99
5	Appendix 1 – References	109
6	Appendix 2 – Glossary.....	115
6.1	Acronyms and Abbreviations	115
