

Table of Contents

1	Introduction	7
1.1	Background	7
1.2	Scope	7
1.3	Key Concepts and Terms	8
1.4	Guide Structure	12
2	Regulatory	15
2.1	Introduction	15
2.2	Regulatory Requirements and Guidance	15
2.3	Containment versus Classification	18
2.4	Critical Quality Attributes and Critical Process Parameters	19
2.5	Biopharmaceutical Production	21
2.6	Facility Design Discussions	22
2.7	Sources of Information	22
3	Risk Management	25
3.1	Introduction	25
3.2	Risk Management	25
4	Process Closure	31
4.1	Introduction	31
4.2	Sources of Product and Process Contamination	31
4.3	Providing Appropriate and Effective Layers of Protection to a Bioprocess Unit Operation	34
4.4	Demonstrating that Processes are Closed	37
4.5	Appropriate Environments Based on Risk	42
5	Operations	49
5.1	Introduction	49
5.2	Multiple Product Operations	49
5.3	Single Use Systems	51
5.4	Impact of Closed and Open Systems on Operations	51
5.5	Automation, Procedures, and Training	55
5.6	Capacity, Scheduling, and Maintenance	58
5.7	Supply Chain	60
6	cGMP Layout Approaches	61
6.1	Introduction	61
6.2	Production Capacity, Process, Scale and Technologies	61
6.3	Product Protection and Segregation Applications	65
6.4	Logistical Segregation Considerations	74
6.5	Facility and Process Flows	76
6.6	Equipment and Facility Cleaning and Finishes	78
6.7	Clinical Trial and Commercial Production	81
6.8	Vaccines and Biological Hazard Containment	81
6.9	Production Support Areas	83

7	Architectural.....	85
7.1	Introduction	85
7.2	Facility Design.....	85
7.3	Placing the Facility on the Site.....	89
7.4	Envelope/Building Shell Design and Visual Design Influences.....	91
7.5	Construction Issues	92
7.6	Permitting, Code, and Insurance Issues.....	94
7.7	Facility Design and Design Management Methodologies and Tools.....	95
8	Mechanical	97
8.1	Introduction	97
8.2	Mechanical Systems and Environmental Controls.....	98
8.3	Fire Protection.....	108
8.4	Electrical	109
9	Sustainability	111
9.1	Sustainability in the Context of Biopharmaceutical Facility Design.....	111
10	Appendix 1 – Supporting Information.....	113
10.1	Mechanical Information.....	114
10.2	Methods of Environmental Classification through Risk Assessment	116
11	Appendix 2 – References	121
12	Appendix 3 – Glossary	127
12.1	Acronyms and Abbreviations	128
12.2	Definitions	130
