New Pharmaceutical Manufacturing Facility

Tuesday, April 30, 2019

About the Facility:
You will be touring McGuff's 86,000 sq. ft. state-of-the-art, aseptic fill, pharmaceutical manufacturing facility in Santa Ana. This new facility is designed to meet the customer's demand for:

- McGuff Pharmaceutical labeled injectable products
- Contract manufactured products
- Clinical trial products
- 503(b) Outsourcing Facility products and services

“The new McGuff facility will be capable of manufacturing high-quality sterile drugs in large and small quantities and is designed to meet US, EU and Japanese regulatory requirements. The facility will be capable of producing sterile potent, non-potent, controlled substance and hazardous drugs in liquid vials, cartridges, and syringes. All produced within an isolator environment” said Ron McGuff, President.

The McGuff Family of Companies has a 45 year history of excellence in the pharmaceutical and medical product markets. “This facility is designed to provide flexible outcomes in pharmaceutical aseptic production that will provide our internal and external customers with rapid turnaround times for small or large aseptic processing.” Said Mr. McGuff.

McGuff Pharmaceuticals, Inc., a division of McGuff Company, remains a family and veteran owned company. McGuff is a Food and Drug Administration inspected sterile fill manufacturer, that maintains a tradition of quality and core competency in current Good Manufacturing Practices.

Mr. McGuff added in closing, “McGuff’s greatest asset is and always will be our employees. Without their dedication and hard work to provide customers with personalized services, high-quality products, and great customer care none of this would be possible. McGuff and its employees continue to ensure the stable supply of high-quality drugs to patients around the world.”

About the Speaker:
Damon Jones is Vice President and Director of Operations at McGuff Pharmaceutical. He has over 34 years of experience including managing and directing multifaceted medical device, pharmaceutical, and compounding pharmacy operations. His experience includes, managing research and product development activities for medical devices (e.g. bioprosthetic heart valves and associated devices), managing and directing various facets of medical device and pharmaceutical manufacturing operations, and directing quality systems for compounding pharmacy operations specialized in sterile injectable products. His responsibilities have included multiple departments in manufacturing, operations, engineering, R&D, quality assurance, regulatory affairs, and working with marketing and sales.

Damon's background includes varied and successful experiences in developing and implementing a wide range of products, programs, facilities, manufacturing operations, quality systems, technology transfers (domestic and international) and business strategies for medical device and pharmaceutical manufacturing operations.

He has a Bachelor of Science degree in Medical Microbiology from California State University, Long Beach, (Chemistry minor) and an MBA from the University of Phoenix, AZ. Damon has been an ISPE member for over 20 years and was also a Certified Quality Engineer through American Society for Quality.
